Please amend the claims as follows:

31 1. A metering receptacle, comprising: an elongate hollow body having a first end with a closable exit opening and a second end; a plastic plunger stopper accommodated in the hollow body in a longitudinally displaceable manner so as to close the second end of the hollow body; and a plunger rod attached to the stopper, the plunger stopper including a sealing stopper part of plastic which is immovably fixed completely within the elongate hollow body and has a centric through-bore for the passage of the plunger rod, and a longitudinally displaceable plunger part of lubricious plastic connected to the plunger rod so that the displaceable plunger part is movable away from the sealing stopper part when the plunger rod is moved through the through-bore.
